

How to create Ether wallet?

Goto <https://www.myetherwallet.com> (aka MEW)
bookmark this link

The screenshot shows the MyEtherWallet interface for creating a new wallet. At the top, there is a red warning banner with a quote: "You can't patch stupid. A fool and his money will soon part." - advice from reddit. Below this, the MyEtherWallet logo and version (3.10.0.4) are displayed. The main content area is titled "Create New Wallet" and contains a form with the heading "Enter a password". The password field contains the text "LoseThisPasswordWillLoseYourEther". Below the form is a blue button labeled "Create New Wallet". To the right of the form, there is a sidebar with a question mark icon and three sections: "Ledger / TREZOR:", "Jaxx / Metamask:", and "Mist / Geth / Parity:". Each section provides instructions on how to use the respective hardware or software wallet to access the account. The "Ledger / TREZOR" section says to use the Ledger or TREZOR device. The "Jaxx / Metamask" section says to use the Mnemonic Phrase. The "Mist / Geth / Parity" section says to use the Keystore File (UTC / JSON). At the bottom of the sidebar is a link for "Guides & FAQ".

Input a password that you will remember for sure as you can never recover this password! If you lose it, you will lose all you ether stored in this wallet.

Press "Create New Wallet"

Save your **Keystore** File.

[Download Keystore File \(UTC / JSON\)](#)

Do not lose it! It cannot be recovered if you lose it.

Do not share it! Your funds will be stolen if you use this file on a malicious/phishing site.

Make a backup! Secure it like the millions of dollars it may one day be worth.

[I understand. Continue.](#)

Press "Download ..."

And save it into at least 2 USB flash drives! (First step to secure your Ether is to store everything off the internet)

Press "I understand .."

Save Your **Private Key**.

[Print Paper Wallet](#)

Do not lose it! It cannot be recovered if you lose it.

Do not share it! Your funds will be stolen if you use this file on a malicious/phishing site.

Make a backup! Secure it like the millions of dollars it may one day be worth.

[Save Your Address. →](#)

Press "Print Paper Wallet"

"Your address" is public like bank account that you can ask anyone to send ETH to you.

"Your Private Key" is private and everyone has it will have full power to control your wallet.

Please put it in safe place.

Remember this image

You are done!

Tips:

- The password is long and complicated but you can memorize it.
- Use password manager – e.g., <https://1password.com/>
- Copy and save it in a password protected word/excel file and save the file into USB flash drive and stay offline.
