

Shipper Sign up

Information Collection Statement (PICS)

This information collection statement has been reviewed and approved by ETH Smart Contract Tech Ltd. ("the Company") management and board of advisors, who collectively oversee the 300cubits project.

Statement of Purpose

The information provided by Shipper registrants will be used to record and identify companies and their representatives from the shipping industry, specifically non-vessel operators (NVO), beneficial cargo owners (BCO) and third-party logistics providers (3PL) who are interested to receive free TEU tokens as provided by the Company. The individual representatives of these companies are expected to provide personal and corporate contact information for further communication purposes, and other information including liner data to assist the Company in calculating their TEU allocation.

Obligatory Nature of Data Provision

Note that the personal and corporate data requested in the shipper registration form is mandatory. Registrants who do not provide complete data may be dis-qualified from TEU distribution participation.

Statement of Possible Transferees

The Company will not sell information collected through the shipper registration process to other individuals or institutions. The Company may expose information of shipper registrants, protected under Non-Disclosure Agreements, with vendor(s) who assist in the design and maintenance of the 300cubits web site. The purpose of this exposure will be to ensure that the vendors understand the format and purpose of the data for web site development and/or token sale purposes.

The Company will comply with requests from law enforcement agencies, if and when they arise, interested in the identities and activities of participating shippers. It will be the policy of the Company, in compliance with the requirements of the jurisdiction of the requesting agency and Hong Kong law, not to alert the individual that he/she is being investigated.

Marketing information

In addition to the shipper registration process, your personal and corporate data may be used by the Company management for providing marketing information to you about its own corporation, products and the TEU Tokens. The marketing themes will encompass milestones, achievements and events that the Company

believes would be of interest to actual and potential TEU token holders, such as: industry conference, media exposure, product release updates, client and partnership announcements, etc. Individuals will have the option to discontinue receipt of such marketing materials.

Statement of Rights of Access and Correction and Contact Detail

The individual who provides personal and corporate data to the shipper registration page has the right to request access to the data input by him/her. The individual has the right to correct his/her data held by the Company.

Notice of Contact Person for Requesting Access or Correction

The individual wishing to request access to or correct his/her information can edit that data through the shipper registration page. The individual can contact info@300cubits.tech in case further assistance is necessary.

Statement of Security Measures

The Company safeguards information and data securely in the Company's system, retained on a needed basis. Only trained, authorized staff have access to the data. The Company will only store data online on a needed basis. The Company may, from time to time, move unneeded data to offline, in form of password protected hard drive safe kept in a bank safe with only authorized access by the officer(s) of the Company for law enforcement and audit purpose. Access procedures are documented in internal compliance procedures.
